Computer Science Student | AI Agent Tester

Professional Summary

Computer science student and AI Agent Tester at Aetheron, with practical experience reviewing voice-agent behaviour, investigating issues and checking prompt changes. Builds Python tools, desktop software and AWS storage projects, alongside hands-on PC hardware and troubleshooting experience.

Technical Skills

AI Agent Testing

- Test cases, edge cases, production call review and regression testing
- Prompt debugging and checking behaviour changes in staging

Programming & Tools

- Python, object-oriented programming and JSON storage
- HTML, CSS, JavaScript and GitHub version-control fundamentals
- Command line and basic PowerShell; Jira and Agile workflow exposure

Cloud, IT & Systems

- AWS S3, IAM permissions, encryption and access-control testing
- PC assembly, upgrades, diagnostics and BIOS/UEFI boot troubleshooting
- Windows 10/11 installation and configuration, drivers, software and system optimisation

Networking & Security (Foundational)

- LANs, IP addressing, DNS and DHCP
- Threat awareness, access control, security principles and safe computing practices

Projects

JARVIS | macOS Assistant | In development

Developing a voice-led assistant using an on-device Qwen model. Features include chat, speech input and replies, meeting transcripts, file analysis, screen context and reviewed actions in supported Mac apps. Refining reliability, response speed and memory use.

Secure Cloud File Storage | CST230

Built an AWS S3 storage project using encryption and IAM permissions to control access. A web interface for sign-in, uploads and downloads is in development.

Task Planner | Python

Developed a command-line task management application using object-oriented programming and JSON storage.

Inventory Management System | Nexus

Designed an inventory management system with structured data handling and basic security considerations.

Personal IT & Systems Projects

Built and maintained multiple desktop PCs, diagnosing hardware, driver, boot, power, peripheral and system stability issues. Configured systems for performance and reliability.

Education

Bachelor of Computer Science

In progress
SAE Institute, Australia
2025 - present

Relevant Study Areas

Programming
Human-Computer Interaction
Cybersecurity
IT Fundamentals

Diploma of Business

Prestige Service Training
2021 - 2023

Work Experience

AI Agent Tester

Aetheron
May 2026 - present

Test voice agents, review production calls, investigate unexpected responses and refine prompts. Check changes in staging and run regression tests.

Crew Trainer

McDonald's
2021 - June 2026

Trained crew members and supported reliable service, communication and procedural compliance.

Qualifications & Training

Certificate III in Retail

CompTIA IT Fundamentals (ITF+) coursework

LinkedIn Learning, 2025
Computer hardware, operating systems, networking, security, troubleshooting, databases and basic programming concepts.
